<p><b>SP/CR</b></p> 	<p>Two units of 35mm <math>\Phi</math> 80cm distance road with M-20 thread</p>

We would really like you to experience our active, digitally powered speaker systems for their important **advantages: powerful** with high performance in a small format that allows **easy transportation**. **The set-up is much simpler than traditional passive systems** that need separate amplifiers and processor rack, several kind of cables and hours of tune-in for good sound. Active Master Audio systems are literally **plug-and-play**. With **PROSYSTEM-SIX** you **just need to connect the signal and power cables to the cabinets – in less than 5 minutes you are up and running!**

**Advanced sound systems since 1972**
